# Weekly Coal Production

Production for Week Ended:  
May 9, 1987

# Preface

## The WCP

The *Weekly Coal Production* (WCP) provides weekly production estimates of U.S. coal by state, as well as supplementary data which are published twice a month. Supplement 1 includes monthly statistics on U.S. coal production and aggregated annual historical data on coal supply and demand, consumption, stocks, imports, and exports. Supplement 2 contains monthly data covering electric utility coal consumption, stocks, and receipts; and coal imports and exports.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its

data collection and dissemination responsibilities as specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report*, the *Quarterly Coal Report*, *Coal Production 1985*, and *Coal Data: A Reference*.

This publication was prepared by Judith Wood under the direction of John E. Daniels, Chief, Data Systems Branch. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at (202/586-8800).*

		31. Average Price of Briquette Imports .....	28

## Highlights

U.S. coal production in the week ended May 9, 1987, as estimated by the Energy Information Administration, totaled 16.5 million short tons (bituminous coal and lignite, 16.4 million short tons; Pennsylvania anthracite, .08 million short tons). This was 3.3 percent lower than in the previous week, and was 1.5 percent lower than production in the corresponding week of 1986.

Settlements were reached between striking United Mine Workers of America (UMWA) and two coal companies. Pittsburg and Midway's (P&M) McKinley mine in New Mexico and Edna mine in Colorado resumed operations on May 6, 1987. The P&M Kemmerer mine in Wyoming was shut down by a strike from April 20 to May 11, 1987. For the five Peabody Coal Company mines in Arizona, Colorado, and Montana that have not operated since March 22, 1987, strike settlements were ratified and operations resumed on May 11 and 12, 1987.

In other strike actions, the FMC's Skull Point mine in Wyoming was shut down on April 24, 1987, but shipments have continued from prior loadings. At the Cyprus Minerals Colorado Yampa mine in Colorado, miners walked off the job April 23, 1987, but company personnel are continuing operations and normal deliveries. In Eastern Kentucky, Blue Diamond Coal Company's Leatherwood mine was closed when the union contract expired midnight May 4, 1987, and no coal is being mined or shipped.

Cumulative U.S. coal production from January 1 through May 9, 1987, was estimated at 309.1 million short tons, 6.0 percent below the 328.9 million short tons produced in the comparable period in 1986.

The methodology used to make weekly estimates of coal production was published in the Weekly Coal Production (DOE/EIA-0218(86/35)), released for publication on September 8, 1986.
